Claims 23, 27 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter, which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. Applicants do not disclose how to make the claimed "chemical compounds" which are 1, 25-Dihydroxy vitamin D receptor antagonists.

Claims 21-27, 29 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claims 21, 25, 27 "Receptors" is vague. What do the receptors do upon binding? Where are they located? In claim 25 "antagonist" is vague; what does the antagonist do? In claim 26 "antibody" is vague; antibody against what?

No claims allowed.
